

Passionate about building web applications that actually work well and solve real problems. Highly skilled in programming design, development, and implementation of functional specifications. I'm always learning new tools and approaches because technology moves fast, and I find it exciting to apply fresh ideas to deliver applications that users find valuable and easy to use.

EXPERIENCE

- Inrec Productive Research Solutions and Services Pvt. Ltd — Full Stack Developer, Kolkata, WB

Nov 2024 – Dec 2025

 - Re-architected attendance system from monolithic C# .NET to **React + .NET Core APIs**, improving scalability and maintainability.
 - Built **biometric-integrated attendance system** (Hikvision) enabling automated, real-time tracking.
 - Developed **SEO-optimized Next.js websites** and an AMC platform using **Node.js, GraphQL**, streamlining operations.
 - Set up **CI/CD pipelines and deployments** using Git/GitHub, improving release efficiency.
- Hemraj Industries Pvt. Ltd. — MIS Executive, Bardhaman, WB

Jul 2024 – Aug 2024

 - Automated **data pipelines and reporting workflows** using Google Apps Script, reducing manual effort.
 - Built **real-time dashboards in Looker Studio**, improving visibility for business decisions.
- Ecovista Industries Pvt. Ltd. — IT & Google Workspace Admin, Kano, Nigeria

Jan 2022 – Apr 2024

 - Designed **automated workflows and data systems** across departments using Google Workspace, Apps Script, and GCP.
 - Streamlined operations by implementing **data-driven processes and reporting automation**.

PROJECTS

- Inloom – Handmade Artists Marketplace *Live*

2026

Developed a full-stack e-commerce marketplace for handmade artists, enabling product listing, order management, and seamless buyer-seller interactions. Built multi-role dashboards for admins and sellers, integrated WhatsApp-based authentication and notifications, and designed a scalable backend architecture to support marketplace operations and growth.

Tech Stack: Node.js, GraphQL (API design), PostgreSQL (relational data modeling), Next.js (SSR + frontend), WhatsApp Business API (OTP authentication, transactional messaging)
- School Management System (Web + Mobile Platform) *Live*

2026

Built a comprehensive school management platform to digitize academic, administrative, and financial workflows. Developed web dashboards for administrators and mobile applications for students and staff, enabling real-time attendance tracking, communication, and performance monitoring, along with secure online fee payments.

Tech Stack: Node.js (backend services), GraphQL, Next.js (admin application), React Native (mobile apps), PostgreSQL (data management), Cashfree Payments (fee transactions), RBAC (access control), real-time notifications
- Biometric Data Collection Microservice *GitHub*

Nov 2025

Engineered a fault-tolerant microservice to collect and persist attendance data from biometric devices under unreliable network conditions, ensuring zero data loss through queue-based processing and recovery mechanisms. Designed the system for high-throughput ingestion and long-term scalability.

Tech Stack: Node.js, Express (microservice framework), PostgreSQL/Any db configurable (storage + partitioning), Redis (queue broker), Bull Queue (async jobs, retries, recovery pipelines)
- AI-powered Product Mockup Image Generator *GitHub*

Dec 2025

Developed an AI-powered platform to generate high-quality product mockups from raw images using generative AI. Enabled customizable scene generation, batch processing, and real-time previews while optimizing performance with a hybrid rendering architecture.

Tech Stack: Next.js (SSR + CSR hybrid), Google GenAI (Gemini 2.5 Flash Image), image processing pipelines, batch processing workflows

EDUCATION

- Bachelor of Computer Applications

Jan 2024 - Dec 2026

Lovely Professional University, Punjab, India
Computer Applications and Engineering with Specialization in Web Development

SKILLS

Languages	JavaScript, TypeScript, C, C#, HTML, CSS, SQL
Frameworks & Libraries	Node.js, Express, GraphQL, .NET Core, React.js, Next.js, Angular, React Native, Expo
DevOps/Platforms	Linux, Git, GitHub, AWS, GCP, Docker, Prisma ORM, Supabase, CI/CD, Automations, Whatsapp Cloud API
Database	PostgreSQL, MSSQL, MongoDB
